

Dhaka International University (DIU)

Office of the Director | Information Technology & Systems Division (ITSD)

1. IT Ecosystem Infrastructure

The Information Technology & Systems Division (ITSD) at Dhaka International University manages the campus network, digital learning ecosystems, student portals, and computational resources. This guide outlines user rights and infrastructure availability for students, faculty, and administrative staff.

2. Institutional Digital Identity & Credentials

Upon formal enrollment or employment confirmation, every user is provisioned with a unique set of digital credentials:

- **DIU Smart Domain Account:** A unified username and password that provides access to the university's local intranet, computer laboratories, and institutional Wi-Fi networks.
- **Official Institutional Email:** All students receive a dedicated `...@diu.ac` or student domain email address. This email serves as the official channel for all institutional communication, exam notices, and system alerts.

3. Core Digital Portals & Platforms

3.1 Integrated Student Portal

Students can access the central student information management platform via web browser to manage their academic journey:

- **Registration Management:** Online course advising, adding, and dropping courses during Week 1 of each trimester.
- **Financial Ledgers:** Tracking tuition fees payments, printing billing receipts, and applying for clearance tokens.
- **Academic Profiles:** Viewing trimester tabulations, midterm scores, absolute letter grades, and total accumulated CGPA.

3.2 Learning Management System (LMS)

DIU uses a centralized online classroom framework where students can:

- Download lecture slides, digital readings, and syllabi uploaded by faculty.

- Submit digital assignments, participate in class forums, and take continuous assessment quizzes.

4. Campus Wi-Fi and Computer Lab Policies

- **Authentication Mandate:** Users must authenticate using their official DIU login credentials to connect to the campus Wi-Fi network.
- **Bandwidth Allocation:** Network bandwidth is optimized for educational activities. Media streaming and downloads are subject to dynamic throttling.
- **Lab Conduct:** Modifying computer hardware setups, installing third-party software packages, or executing unapproved executable tools inside university computer laboratories is strictly prohibited.

5. Technical Support and Helpdesk

For password resets, email access issues, portal malfunctions, or network connectivity problems, users can contact the IT Helpdesk:

- **Support Portal:** itsupport.diu.ac
- **Physical Desk Locations:** Ground floor IT Operations Room at both Permanent and City campuses.
